

Function Name	#	Test Description	Sample Input		Expected Result	Actual Result	P/F
displayMainMenu()	1	Test valid whole number input	1		return menuChoice;	return menuChoice;	P
	2	Test valid whole number input	2		return menuChoice;	return menuChoice;	P
	3	Test valid whole number input	3		return menuChoice;	return menuChoice;	P
	4	Test valid whole number input	4		return menuChoice;	return menuChoice;	P
	5	Test valid floating input	2.0		return menuChoice;	return menuChoice;	P
	6	Test out-of-range whole input	2.2		printError();	printError();	P
	7	Test out-of-range whole input	-1		printError();	printError();	P
	8	Test out-of-range floating input	6		printError();	printError();	P
	9	Test character input	s		printError();	printError();	P
	10	Test string input	hello		printError();	printError();	P
askID()	1	Test valid whole number input	12345678		return userID;	return userID;	P
	2	Test valid whole number input	55555555		return userID;	return userID;	P
	3	Test valid whole number input	87654321		return userID;	return userID;	P
	4	Test valid whole number input	12441244		return userID;	return userID;	P
	5	Test valid floating input	12345678.1264		return userID;	return userID;	P
	6	Test out-of-range whole input	1234		printError();	printError();	P
	7	Test out-of-range whole input	999999999999		printError();	printError();	P
	8	Test out-of-range floating input	0.12345678		printError();	printError();	P
	9	Test character input	f		printError();	printError();	P
	10	Test string input	id		printError();	printError();	P
checkAnswers()	1	Test correct whole number input	4	4	flag = 1	flag = 1	P
	2	Test valid floating input	8.4	8.4	flag = 1	flag = 1	P
	3	Test valid floating input	12.6	12.6	flag = 1	flag = 1	P
	4	Test incorrect valid whole input	4	2	flag = 0	flag = 0	P
	5	Test incorrect valid float input	8.4	12.6	flag = 0	flag = 0	P
	6	Test out-of-range whole input	4	-4	flag = 0	flag = 0	P
	7	Test out-of-range whole input	6	-6	flag = 0	flag = 0	P
	8	Test out-of-range floating input	12.6	-12.6	flag = 0	flag = 0	P
	9	Test character input	8.4	c	flag = 0	flag = 0	P
	10	Test string input	4	queen	flag = 0	flag = 0	P
